

## WELCOME!

You have chosen one of the most beautiful resorts for them who love nature.

Here in the north the population is so little and the climate so warm that the diversity of animals and plants is very wide. This is one of the regions where moose and beaver lives. In this territory you will find also the big four of Scandinavia. bear, wolf, lynx and wolverine.

### It's cristal clear

To discover the wilderness on your own - nothing is more exciting.

A trip together with **Erlebnis Profis** will take you to new dimensions.

You will not only see nature, you will also understand her. On small paths and magical places, which are even unknown by the original residents.

### Erlebnis Profis offers more

The team consists of first class guides, who are trained by international coaches, because of this **Erlebnis Profis** knows more and will share its knowledge with you. That's why you are on the right side with **Erlebnis Profis**.

### More means not better

Adventures in nature and mass tourism don't match; because of this **Erlebnis Profis** has only small groups on their trips (max. 8 people).

They take you there where others want to be. They don't have busses, and drive only in Land Rover's.
